Cognitive Functioning¹

MCI		Dementia
27	Mini-Mental State Exam (MMSE)	22
23	Montreal Cognitive Assessment (MoCA)	18
25	Rowland Universal Dementia Assessment Scale (RUDAS)	19

Daily Functioning²

MCI		Dementia
95%	Independent in personal activities of daily living	75%
74%	Independent in instrumental activities of daily living	25%
66%	Currently driving	32%

Self-reported Well-being

Participants

Good = **62%**
Fair = **32%**
Poor = **6%**

Carers

Good = **88%**
Fair = **9%**
Poor = **3%**

Experience with Diagnostic Services

Participants

Good = **88%**
Fair = **9%**
Poor = **3%**

Carers

Good = **89%**
Fair = **10%**
Poor = **1%**

¹These are median scores of the MMSE, MoCA and RUDAS, which range from 0 to 30 with higher scores indicating high level of cognitive functioning.

²Level of daily functioning may be impacted by factors other than as direct results of dementia and MCI, such as physical and/ or sensory impairments. Personal activities of daily living include activities such as dressing, showering and toileting. Instrumental activities of daily living include activities such as cooking, laundry and managing finances.
